Notes

- 1 Add an Upcoming Episodes Preview box detailing information on the next two (2) episodes that will air after the current date. Appears after "Recent Articles". If no episodes are scheduled, do not draw box. After airdate has passed, move first upcoming episode to "Recent Episodes" list, remove oldest episode from that list, then append next upcoming episode to first list.
- 2 Display IGN Rating at end of episode summary (if extant. See Episode 602 for example of no rating.)
- 3 Include a link to IGN Review of episode (if extant. See Episode 602 for example of no review.)
- 4 Add a Recent Episodes preview box with a list of the two (2) most recent past episodes. Appears after "Upcoming Episode". List goes from most recent to least recent. If no previous episodes exist, do not draw box. If only one recent episode exists (which would only occur in the case of a new Series which is scheduled to air its second episode), show only one recent episode.

Note: Content of Upcoming Episodes and Recent Episodes needs to be kept current by republishing in a timely manner or by other technical means.

ADDITIONAL NOTES:

Upcoming and Previous episode lists will use the complete episode description.

A daily publish should suffice for timeliness.

Episodes move from Upcoming to Recent on the day after airing.

Recent episodes will remain on list for two (2) weeks after which they must be removed.
